DETAILED ACTION

Drawings

1. The drawings (Fig.1 and Fig. 3 with added "Prior Art" labels) were received on 9/15/08. These drawings are acceptable.

Specification

2. The amendment to the specification, received on 9/15/08, is acceptable.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 step (a) recites providing a set of at least 2^m nxn matrices...where m is a positive integer and n is an integer greater than 1; (b) allocating each binary number between 0 and binary 2^m-1 to a respective one of said matrices;

For m=1 and n=2, claim 1 requires a set of 2 2x2 matrices, and allocating each binary number between 0 and $2^1-1 = 1$ to a respective one of said matrices. How are binary 0 and binary 1 are allocated to a respective one of said matrices, the set of 2 2x2 matrices?

Art Unit: 2611

Independent claim 11 recites limitations similar to the one of claim 1 and is also rejected based on the same rationale.

Dependent claims 2-10, 11 are also rejected since they at least contain limitations of their respective independent claims.

Allowable Subject Matter

5. Claims 1-12 would be allowed if they overcome the 35 U.S.C 112, second paragraph rejection above.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hassibi et al. (U.S. 6,801,579) discloses a method and system for transmitting data, that provides a set of at least 2^m $n \times n$ matrices that represent fixed-point-free groups (but not extensions of), each said matrix, including n^2 matrix elements, where m is a positive integer and n is an integer greater than 1.
